cost would be only about Rs. 3000 per kg. and not Rs. 4364./21 per kg.;

(d) what are the circumstances under which Carbamazepine liquid prices were based still on higher price of the bulk drug; and

(e) what steps have been taken to investigate the matter?

THE MINISTER OF STATE IN THE MINISTRY OF CHEMICALS AND FERTILIZERS (SHRI EDUARDO FALEIRO): (a) and (b) Before 9th June, 1992, the ceiling prices of formulations based on Carbamezepine were recommended by DPRC Sub-Committee in its 142nd meeting held on 12.11.1991. The landed cost of Rs. 4364.21/ kg of Carbamezapine was calculated on the basis of CIF price available for the latest full year i.e. 1990-91 duly adjusted for change in exchange rate and taking into account the then prevailing custom duty and countervailing duty.

(c) No, Sir. The exact weighted average CIF prices, as per BICP records, for the years 1990-91 and 1991-92 were Rs. 1435.81 and Rs. 1616.34 kg. respectivly. Corresponding landed costs work out to Rs. 4364.21 kg and Rs. 3730.81 kg. after due inclusion of charge in exchange rate and prevailing rates of custom and contervailing duties.

(d) and (e) As already stated in reply to part (c) and (d) of Rajya Sabha Unstarred Question No. 1606 Dt. 3.12.1992 the higher price was adopted as a special case on the quality and its suitability considerations for the manufacture of syrup only, keeping in view the facts that this formulation meant for paediatric use and manufactured by only one company.
